Portfolio: [johnruben.vercel.com](https://johnruben.vercel.com)

## EDUCATION

- Karunya Institute of Technology and Sciences** Coimbatore , India  
*Bachelor of Technology - Computer Science and Engineering* *September 2021 - Current*  
*Courses: Operating Systems, Data Structures, Analysis Of Algorithms, Web-Technology, Microprocessor and Micro-controller, Data-science, Networking, Databases*

## INTERNSHIP

- Cisco - Virtual Python Programming Internship** Remote  
*Student Developer (Full-time)* *Summer 2022*  
Use Python3 to develop a industry grade networking strategies Enabled me in learning a sophisticated networking designing skill
- 3 Strands Consulting Services Private Limited** Remote  
*Extension Intern (Full-time)* *June - July 2024*  
Developed a Extension in TypeScript for Paranext using the API from AqUA for displaying the projects assessments, automating the token fetching and automating the caching system to download all the projects and retrieve it even if the device is offline.
- 3 Strands Consulting Services Private Limited** Remote  
*ML Research Intern (Part-time)* *July - Nov 2024*  
Researched and evaluated multilingual sentence similarity models (Laser vs. LaBSE) to determine the best fit for cross-language sentence comparison. Conducted model comparisons to optimize sentence matching across diverse languages, enhancing multilingual processing capabilities.

## SKILLS SUMMARY

- Languages:** Python(Intermediate), HTML(Advance), CSS(Advance), JavaScript (Intermediate), Java(Intermediate), C#(Intermediate), TypeScript(Intermediate), SQL (Intermediate)
- Frameworks:** React(Intermediate), Angular(Intermediate), ASP.NET(Intermediate), Django(Beginner), Flask(Intermediate), Node.js(Intermediate), Express.js(Intermediate), MEAN Stack(Intermediate), MERN Stack(Intermediate), FastAPI(Intermediate)
- Tools:** Heroku, Docker, GIT, MongoDB, MySQL, SQLite, PostgreSQL, Postman
- Platforms:** Linux, Arduino, RaspberryPi, AWS, GCP
- Technical Skills:** Web Development, Front-end Development, DevOps, Machine Learning, Data Analytics, CNN, Data Science, Automation
- Soft Skills:** Leadership, Event Management, Video Editing, Public Speaking, Time Management

## PROJECTS

- Prompt Engineering based on Model Architecture and Real-Time Feedback Analysis on GenAI Performance (Python, API, Streamlit, Flask, User State Management, Data Visualization):** Developed a real-time feedback tool to refine prompts iteratively and applied structured techniques like zero-shot, few-shot, and chain-of-thought prompting to boost generative AI response quality, accuracy, coherence, and adaptability across GPT-4 and open-source LLMs. Analyzed metrics including ARI score, Gunning Fog Index, lexical diversity, average sentence length, word count, sentence count, and sentiment polarity, demonstrating that optimized prompts enhance complexity, vocabulary richness, consistency, and neutrality while reducing performance disparities between proprietary and open-source models. Tech: Python, CSS, HTML
- AI-Tutoring Webapp (React, Next.js, TypeScript, Gemini, API, User State Management, MongoDB):** Creating a WebApp that lets the Users Learn through a specialized AI Tutor for any particular Subject, attend test and get graded by Gemini, personalized Chat instance for that subject where user can upload media files and ask it to explain or ask questions, get personalized recommendation for the subject, a progress bar and Graph in every chat instance Tech: React, Next.js, API, Tailwind CSS, Google Gemini
- Supply-Chain Management using Blockchain (React, Next.js, Flask, Python, Blockchain, API):** Developed a WebApp that lets the Vendor store the transaction and the duration for it to reach the destination in a Local Blockchain, Buyers can access the same by the QR or the dashboard. Tech: Flask, Python, Blockchain, React, Next.js, API (March '2024)
- Class Emotion Analysis (Streamlit, Flask, Python, Whisper, YOLO, Image Classification, Speech to Text, API):** Created a Model for Tracking the students emotions and analyzing them to flag the lectures they didn't understand based on their attention level, helps faculty to send transcript of the lecture which they taught to students using our inbuilt model Tech: Flask, Python, Tensorflow, Streamlit, YOLO, Whisper (February '2024)
- Mindkraft 2024 Techno Fest - Website(React, Next.js):** Led the development of a responsive website for Mindkraft 2024 Techno Fest using React and Next.js. Implemented features to showcase department events with a focus on user engagement and seamless navigation. Leveraged Express.js for backend functionality and Tailwind CSS for modern styling, ensuring an appealing and intuitive user experience. Tech: React, Next.js, Express.js, Tailwind CSS, HTML (February '2024)

- **To-Do List Using MEAN Stack (User State Management , Angular , MongoDB) :** To-Do List is a task management web app built with the MEAN stack, featuring Angular for the interface, MongoDB for storage, and Node.js with Express.js. It supports user state management, drag-and-drop tasks, filtering, archiving, and more. Hosted on Heroku, styled with HTML and SCSS. Tech: Angular, Heroku, MongoDB, HTML,SCSS,Node.js, Express.js (September '2023)
- **Expense Tracker Using ASP.NET (SEO ,Web Development , SQL ,MVC ,Data Visualization ) :** Developed a Expense Tracker is a web application facilitating efficient expense management. It incorporates streamlined web development, and data visualization. Users can easily track expenses, categorize spending, and generate insightful reports. Employing MVC architecture ensures scalability and maintainability. Tech: C#,MS Server SQL,CSHTML (August '2023)

## CO-CURRICULAR

---

- **TRIAS Hackthon** Onsite  
*Full-Stack Developer* *November 2024*  
 Secured first place and awarded a 10,000 INR prize in the TRIAS 72-hour hackathon by developing a healthcare tech-focused vital management app. Built using Angular, PostgreSQL, and Tailwind CSS, the app provided an innovative solution for efficient health data management.
- **Minds And Machines Society** Onsite  
*Information Technology Coordinator (Full-time)* *September 2023 - Present*  
 As an IT Coordinator I have been given entrusted in managing the technical related areas , and in managing a server for our Club members
- **MindKraft 2024** Onsite  
*Web-Development (Full-time)* *October 2023 - February 2024*  
 Built a website for the Inter-University fest assigned to our team by the Board of MindKraft .My dedication is to create a high-quality website that plays a pivotal role in enhancing the overall experience for participants and attendees and plays a vital role in helping students from other college and universities to participate in the fest

## CERTIFICATIONS

---

- **AI-900: Microsoft Azure AI Fundamentals:** Skills: AI Concepts, Azure Cognitive Services, Azure Machine Learning, NLP, Computer Vision, Conversational AI, Machine Learning Principles, Intelligent Application Development.
- **Google Cloud:** Introduction to Generative AI ,Google Cloud Computing Foundations: Cloud Computing Fundamentals ML and AI in Google Cloud (Skills: GCP,Cloud Applications,Cloud Computing,Cloud Networking,Machine Learning)
- **Google UI/UX Professional Course:** Build Wireframes and Low-Fidelity Prototypes, Start the UX Design Process: Empathize, Define, and Ideate, Foundations of User Experience (UX) Design( Skills: Figma , User Experience Design,Prototype,Wireframe,User Experience,UX Research, Web Application )(Ongoing)
- **Google IT Automation with Python Professional Certificate:** Crash Course on Python, Using Python to Interact with the Operating System,Introduction to Git and GitHub,Troubleshooting and Debugging Techniques,Configuration Management and the Cloud,Automating Real-World Tasks with Python( Skills: Configuration Management, Python Programming, Using Version Control, Troubleshooting and Debugging, Automation)
- **Google Cybersecurity Professional Certificate:** Tools of the Trade: Linux and SQL( Skills: Command line interface (CLI), SQL, Linux, Bash)
- **AWS Generative AI for Developers Professional Certificate:** Getting Started with AWS Generative AI for Developers,Generative AI Applications with Amazon Bedrock,Amazon Bedrock Customization, Optimization and Automation( Skills: Prompt Engineering, Performance Testing, Generative AI, Data Processing, AWS SageMaker, Amazon Web Services, Large Language Modeling, Artificial Intelligence, AI Personalization, Amazon Bedrock, Automation, Responsible AI)
- **SAP Professional Fundamentals:** Skills: Product Strategy, Project Management, Relationship Building, Consulting, Project Implementation, Solution Delivery, Waterfall Methodology, Enterprise Resource Planning, Consultative Approaches, SAP Applications, Systems Thinking, Project Management Life Cycle
